SA-JAS

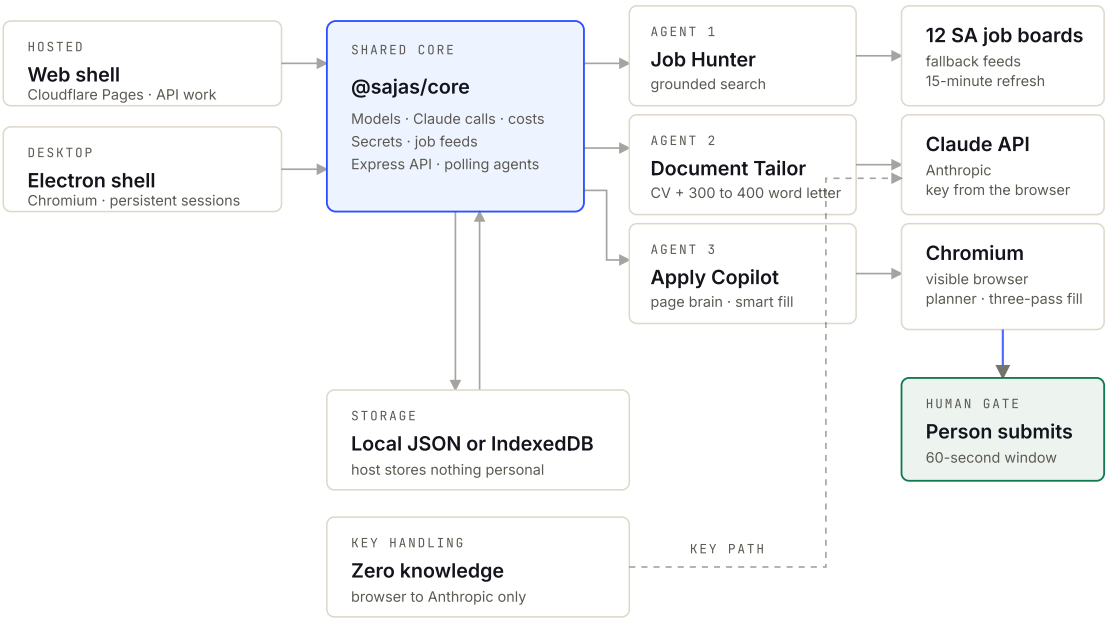

HOSTED WEB ALPHA

SOUTH AFRICAN JOB AGENT SUITE

Three agents find South African vacancies, tailor an ATS-friendly CV and cover letter, and guide the application in a visible browser. The person still presses submit.

STATUS	DESKTOP	AGENTS
Hosted web alpha	Electron app in the repository	3, with human sign-off
JOB BOARDS	**DATA**	**LICENCE**
12 South African fallbacks	Local files or browser IndexedDB	MIT

ARCHITECTURE

The copilot refuses submit, send, finish, confirm and pay wording. CAPTCHAs are handed off, never solved.

The web shell and desktop shell share one core. Three agents call Claude and job feeds, write to local storage, and hand the final submission back to the person.

○ SHARED CORE ○ HUMAN GATE ○ EXTERNAL SERVICES

DECISIONS THAT SHAPED IT

PLAN DECISION — DESIGN DECISION

Hybrid delivery

A hosted web app for API-only work, and a local runner for Chromium, persistent sessions and apply.

Why. Free hosts cannot run Chromium with a persistent profile. Splitting the work by capability keeps the hosted alpha cheap without losing the application flow.

PLAN DECISION — DESIGN DECISION

Local-first data and zero-knowledge keys

The host stores nothing personal, and the Anthropic key travels from the browser to Anthropic only.

Why. A job search exposes identity, work history and sometimes ID numbers. Keeping the data local removes a breach target instead of managing one.

PLAN DECISION — DESIGN DECISION

Never auto-submit

Guards refuse submit, send, finish, confirm and pay wording, and allow only Next, Continue and Proceed on form pages.

Why. An application is a representation made in someone's name. The person confirms, presses once and has 60 seconds to change their mind.

WHAT IS REAL, AND WHAT IS NOT

AREA	STATUS	NOTE
Live service	Alpha	Hosted web alpha at sajas.pages.dev. The Electron desktop build runs from source.
Screenshots	Fictional data	Every screenshot uses the repository's synthetic demo fixture.
Matching score	Fixture	The 82 percent match score is demo data, not a measured result.
Submissions	Human	The copilot never submits. CAPTCHAs are handed off, never solved.
Identifiers	Not stored	ID and passport numbers are not stored by the app.
Licence	MIT	Source is public under the MIT licence.
